

Create and Manage Custom Peer Groups (PG's)

Use this tool to set your default (on login) peer group and to manage your custom peer groups. If you are the creator/owner of a peer group, you can edit and delete it. If you are not the owner, then you can view and copy it.

NOTE on Creating Peer Group: It may take up to 20 minutes for your new peer group or updated peer group to complete the calculation process. If your results appear incorrect, please wait and try again. For additional help, send an email to support@BIGhealthcare.ca.

PG owner displayed

Use any of the pre-defined BIG PG's to help with creating your own custom PG.

Managing PG's. Any user can create a custom PG and this person is the 'owner'. Only the 'owner' of a PG can edit/delete it, but any person can copy it in order to create a different PG.

Create a new custom PG to compare your performance against only those hospitals of interest:

1. Click green button "⊕ Add New".
2. Create a descriptive group name.
3. Select hospitals (use filters and search).
4. Click "save" button.

Copy any existing PG to create your own new custom peer group:

1. Click any existing PG listed OR click the green 'BIG GROUPS' button. The organizations included in these PG's will be displayed in the 'Selected Organizations' list.
2. Un-select organizations that you want to remove and/or add additional organizations from the master list in the left column.

Deleting PG's. Only the 'owner' of a PG can delete it. To reduce clutter and as a courtesy to other people, please consider deleting PG's that you are no longer using.
