## Find your Peers using the Peer Group Builder Tool

**NOTE:** This is a **BETA product** and we are constantly working to improve it. Should you discover any issues, please submit a detailed email to <a href="mailto:support@BIGhealthcare.ca">support@BIGhealthcare.ca</a>.

The Peer Group Builder Tool allows you to search the entire BIG Member database to help you identify peer organizations for comparison. To begin your search, **1**) Find peers. Review/adjust the default filter settings and then click the "Search Now" button. Your search results will be displayed below your own organization. Click any row to review an organization's attributes and begin building a peer group list by clicking the checkbox. **2**) Create new peer group. Switch to the Peer Group List tab to review and create your new peer group, just as you do with the Peer Group Management Tool.
